

and a date of submission will be presented at that time.

Our spring meeting and wilderness weekend was a success as usual. One significant change should be noted. We voted to move our wilderness weekend and annual meeting back two weeks (coinciding not with Herpetology weekend). Essentially, this is due to the general perception that everything has been flowering earlier over the last several years.

Don't forget about our fall meeting and for those in the vicinity, we will be offering two evenings this fall at NHU for the Native Plant Certification Program. These will complete the first cycle of courses at NHU and next spring, we will begin the second cycle with a couple of our beginning core
