

about a growing region (about 100 miles in length).

Collected plants and the **Kentucky Native Plant Society's 25th Anniversary** during the annual Wildflower Weekend at General Bragg State Resort Park. The Kentucky Native Plant Society got its start at General Bragg's Wildflower Weekend in 1986 and continues to promote education, preservation, and protection of Kentucky native plants and ecological systems. One of the best things about Wildflower Weekend is that it brings together some of Kentucky's leading plant professionals and joins them with plant and nature enthusiasts that are looking to find out more about Kentucky's diversity of plants and their ecology. It is always amazing how much that we can see and learn when going on plant fieldtrips with a group and an experienced leader...so many eyes searching, so many eyes finding, so much experience teaching!

FRIDAY, APRIL 18th
