

Since this might appear to be a population of the hairy leg fern, *Myriophyllum lanosum* (Peters.) Griseb. & Windham, a species known from ~20 Kentucky counties. Most will probably know *M. lanosum* as *Chelidonium lanosum* (Peters.) D.C. Eaton, a species recently transferred (along with most North and Central American species of *Chelidonium*) to *Myriophyllum* (Griseb. and Windham 2013).

However, closer inspection will reveal that these Bullitt Co. ferns have
